Giuseppe Savaré - CURRICULUM

PERSONAL INFORMATION

Savaré Giuseppe	ORCID: 0000-0002-0104-4158	MathSciNet: 336952
ResearcherID: H-3651-2014	Scopus: 6602154611	Google Scholar: w7qH1YYAAAAJ
Nationality: Italian	Born in Pavia, 25/08/1966	

Homepage: giuseppesavare.com Email: giuseppe.savare@unibocconi.it
Department of Decision Sciences, Bocconi University, Via Roentgen 1, 20136 Milano, Italy

RESEARCH INTERESTS

Optimal Transport and entropic distances between nonnegative measures; gradient flows, rate-independent problems, and applications to evolution PDEs; analysis in metric-measure spaces: calculus, heat flow, optimal transport, non-smooth Riemannian geometry; variational methods for Partial Differential Equations.

EDUCATION

1984–1988: *Laurea (cum laude) in Mathematics*, University of Pavia, Italy

CURRENT POSITION

2020–: *Full Professor,* Mathematical Analysis. Department of Decision Sciences, Bocconi University

PREVIOUS POSITIONS

2000–2020: *Full Professor,* Mathematical Analysis Department of Mathematics, University of Pavia

1998–2000: *Associate professor,* University of Pavia

1990–1998: *Researcher,* IMATI-CNR, Pavia

FELLOWSHIPS AND AWARDS

2025: ERC Advanced Grant, awarded for the project *Optimal Transport and Metric Structures for Evolution Problems* (OPTiMiSE)

2025: Included in the *Highly Cited Researchers* list by Clarivate for the field of Mathematics

2019–2023: *Hans Fischer senior fellow*, Institute for Advanced Study, Technical University of Munich

2019: *Plenary Speaker*, XXI Congresso Unione Matematica Italiana

2016: *Invited Speaker*, 7^{th} European Congress of Mathematics, Berlin: section "Analysis and PDEs"

2015: *John von Neumann Visiting Professor*, Technical University of Munich

2014: the results on Gradient Flows have been presented in the *Exposé Bourbaki 1065: Flots de gradient dans les espaces métriques et leurs applications d'apré Ambrosio-Gigli-Savaré*, Asterisque 361.

2012: The paper *Chemical reactions as* Γ*-limit of diffusion* SIAM Rev. 54 (2012) (with M. Peletier, M. Veneroni) has been published as SIAM Review's SIGEST award.

2011: *Ennio De Giorgi Prize*, awarded by the *Italian Mathematical Union*

1994: *Gioachino Japichino* Prize, awarded by the *Accademia Nazionale dei Lincei*

SUPERVISION OF GRADUATE STUDENTS

Bocconi University:
current: Alessandro Pinzi
IAS-TUM, Munich:
2022: Giacomo Sodini (co-advised with M. Fornasier, now PostDoc, TU Wien)
University of Pavia:
2019: Nicolò De Ponti (now Tenure-Track Researcher, Politecnico di Milano)
2017: Luca Minotti
2015: Giovanni Bonaschi (co-advised with M. Peletier, Eindhoven; now Portfolio manager fondi Multi Asset)
2014: Dario Mazzoleni (co-advised with A. Pratelli, Erlangen; now Associate Professor, University of Pavia)

2011: Luca Natile
2007: Marco Veneroni (now Associate Professor, University of Pavia)
2006: Stefano Lisini (now Associate Professor, University of Pavia)
2005: Riccarda Rossi (now Associate Professor, University of Brescia)
1998: Simona Sanfelici (co-advised with P. Colli Franzone; now Full Professor, University of Parma)
I also mention the supervision of the Master thesis (subsequently published in international mathematical journals) of Federico Bassetti (now Full Professor, Politecnico di Milano), Laura Spinolo (now Senior Researcher, IMATI-CNR), Sara Daneri (now Associate Professor, GSSI L'Aquila), Giulia Luise (now Researcher, Microsoft)

POSTDOCTORAL FELLOWS

2024–2025: Filippo Riva (now PostDoc, Charles University, Prague)
2021–2023: Luca Tamanini (now Assistant Professor, Università Cattolica del Sacro Cuore, Brescia)
2017–2019: Giulia Cavagnari (now Associate Professor, Politecnico di Milano)
2016–2017: Dario Mazzoleni (now Associate Professor, University of Pavia)
2015–2016: Carlo Orrieri (now Associate Professor, University of Pavia), Matteo Muratori (now Full Professor, Politecnico di Milano)
2009–2011: Edoardo Mainini (now Associate Professor, University of Genova)
2007–2008: Daniel Matthes (now Associate Professor, TUM)
2006–2008: Antonio Marigonda (now Full Professor, University of Verona)

TEACHING ACTIVITIES

University of Pavia:
1998–2020: courses of *Mathematical Methods* (Engineering Faculty) and *Mathematical Analysis* (degree in Mathematics), typically two main courses every year,~140 hours/year
2000–2020: several Ph.D. courses (PDEs, Semigroups, Calculus of Variations, Optimal transport)
Bocconi University:
2020–2025: Mathematical Analysis (Bachelor), Introduction to Real Analysis (Ph.D.)
2025: Alegbraic and Topological Methods (Bachelor)
Several invited courses to *international advanced schools* (as CIME, HIM, SNS, EVEQ)

ORGANISATION OF SCIENTIFIC MEETINGS

2026: MFO Workshop *Flows on Measure Spaces and Applications in Machine Learning*, Oberwolfach (Co-organizers: P. Rigollet, G. Steidl, F.-X. Vialard)
2026: Intensive school *Mathematical Foundations of Machine Learning (MFML 2026)*, Vason (Monte Bondone), Trento.
2025: International School *Mathematical Analysis and Applications*, Lake Como School of Advanced Studies, Villa del Grumello, Como (Co-organizer: M.G. Mora)
2025: Workshop on *Variational Methods and Non-Smooth Geometric Structures with Applications*, June 3-5 2025, Bocconi University, Milan.
2024: Workshop on *Mathematics for Artificial Intelligence and Machine Learning*, Università Bocconi, Milano (Co-organizers: B. Morini, E. De Vito, S. Pieraccini)
2023: Workshop on *Variational and geometric structures for evolution*, CIRM, Trento (Co-organizers: D. Knees, R. Rossi, M. Thomas)
2023: *Workshop on Optimal Transport, Mean-Field Models, and Machine Learning*, IAS-TUM, Munich (Co-organizers: M. Burger, M. Fornasier, G. Peyré)
2026, 2024, 2022, 2018, 2016, 2014, 2012, 2010, 2008: *Workshops on Optimal Transportation and Applications*, Pisa (Co-organizers: L. Ambrosio, G. Buttazzo, N. Gigli)
2022: *Contemporary Trends in Kinetic Theory and PDEs*, Pavia (Co-organizers: J.A. Carrillo, A. Pulvirenti, M. Zanella)
2018: School on *Optimal transport: numerical methods and applications*, Lake Como School of Advanced Studies (Co-organizer: F. Santambrogio).

2018: Workshop *Optimal Control and Mean Field Games*, Pavia (Co-organizers: G. Cavagnari, S. Lisini, C. Orrieri)

2016: Bimester on *Nonlinear Flows*, Research Centre ESI, Vienna (Co-organizers: E. Feireisl, A. Juengel, A. Mielke, U. Stefanelli)

2014 and 2011: MFO Workshop *Variational Methods for Evolution*, Oberwolfach (Co-organizers: L. Ambrosio, A. Mielke, M. Peletier, F. Otto, U. Stefanelli)

2011: Conference *Analysis and Numerics of PDEs. In memory of Enrico Magenes*, Pavia

2010: BIRS Workshop: *Rate-independent systems: Modeling, Analysis, and Computations*, Banff (Co-organizer: U. Stefanelli)

2008: CIME Course: *Nonlinear Partial Differential Equations and Applications*, Cetraro (Co-organizer: L. Ambrosio)

INSTITUTIONAL RESPONSIBILITIES

2026–: Head, Department of Decision Sciences, Bocconi University
2019: Director of the *Advanced School of Ph.D. Higher Education* (SAFD), University of Pavia
2014–2016: *University Assessment Commission*, University of Pavia
2001–2008: Director of the *Ph.D. program in Mathematics and Statistics*, University of Pavia
1998–: IMATI-CNR, research associate

EDITORIAL AND ADVISORY BOARDS

2023–: ESAIM: Control, Optimisation and Calculus of Variations, member of the *editorial board*
2018–: Unione Matematica Italiana, member of the *Scientific Advisory Board*
2014–: C.I.M.E. Foundation, member of the *Scientific Advisory Board*
2016–: Applied Mathematics and Optimization, member of the *editorial board*
2013–: Potential Analysis, member of the *editorial board*

MEMBERSHIPS OF SCIENTIFIC SOCIETIES

2009–: Membro Corrispondente, *Istituto Lombardo, Accademia di Scienze e Lettere*, Milano

Publications

Author of 110 publications, with 15000+ citations, H-index 49 according to Google Scholar.

◇ **Foundation of the theory of metric-measure spaces with *Riemannian Ricci curvature bounded from below* (the so-called RCD(K,N) condition):**

Calculus and heat flow in metric measure spaces and applications to spaces with Ricci bounds from below (with L. Ambrosio, N. Gigli). Invent. Math. 195 (2014), 289–391.
[Heat flow and Cheeger energy in metric–measure spaces: L^2 and Optimal Transport theory]

Metric measure spaces with Riemannian Ricci curvature bounded from below (with L. Ambrosio, N. Gigli). Duke Math. J., 163 (2014):1405–1490.
[The first analysis and characterization of Riemannian RCD(K,∞) spaces with quadratic Cheeger energy]

Bakry-Émery curvature-dimension condition and Riemannian Ricci curvature bounds (with L. Ambrosio, N. Gigli). Annals of Probability, 43 (2015): 339–404.
[The full identification between the Bakry-Émery condition and RCD(K,∞) spaces]

Self-improvement of the Bakry-Émery condition and Wasserstein contraction of the heat flow in RCD(K,∞) metric measure spaces Discrete Contin. Dyn. Syst. 34 (2014): 1641–1661.
[Second order calculus, measure-valued Γ_2-tensor, and improved Bakry-Émery condition]

Convergence of pointed non-compact metric measure spaces and stability of Ricci curvature bounds and heat flows (with N. Gigli, A. Mondino) Proc. Lond. Math. Soc. 111 (2015): 1071–1129.

Nonlinear diffusion equations and curvature conditions in metric measure spaces (with L. Ambrosio, A. Mondino) Mem. Amer. Math. Soc. 262 (2019), no. 1270, v+121 pp.
[The full identification between the Bakry-Émery condition and the RCD(K,N) spaces]

◇ **Metric-Sobolev spaces: identification of the construction by Lipschitz functions and Cheeger energy with the Newtonian approach**

Density of Lipschitz functions and equivalence of weak gradients in metric measure spaces (with L. Ambrosio, N. Gigli) Rev. Mat. Iberoam. 29 (2013): 969–996.

◇ **Entropy-Transport formulation for unbalanced optimal transport and the characterization of the new Hellinger-Kantorovich distance**

Optimal entropy-transport problems and a new Hellinger-Kantorovich distance between positive measures (with M. Liero, A. Mielke). Invent. Math. 211 (2018): 969–1117.

◇ **Foundation of Balanced Viscosity and Visco-Energetic solutions to rate-independent processes in infinite-dimensional spaces**

Balanced viscosity (BV) solutions to infinite-dimensional rate-independent systems (with A. Mielke, R. Rossi). J. Eur. Math. Soc. (JEMS) 18 (2016): 2107–2165. [The first contribution to existence, characterization, and properties of Balanced Viscosity solutions in infinite dimension.]

Viscous corrections of the time incremental minimization scheme and visco-energetic solutions to rate-independent evolution problems. (with L. Minotti) Arch. Ration. Mech. Anal. 227 (2018), no. 2, 477-543.

◇ **The mean-field formulation of spatially inhomogeneous Evolutionary Games**

Spatially Inhomogeneous Evolutionary Games (with L. Ambrosio, M. Fornasier, M. Morandotti) Comm. Pure Appl. Math. 74 (2021): 1353–1402

Monographs and contributions to volumes

Sobolev Spaces in Extended Metric-Measure Spaces in *New Trends on Analysis and Geometry in Metric Spaces.* Lecture Notes in Mathematics, Springer 2022, 117–276.
[The refined theory of metric Sobolev space generated by sub-algebra of Lipschitz functions in extended metric-measure spaces.]

Gradient flows in metric spaces and in the space of probability measures (with L. Ambrosio, N. Gigli) Lectures in Mathematics ETH Zürich. Birkhäuser Verlag, Basel, 2005 (second edition 2008).
The two editions have received more than 1500 citations, according to MSC.

Computational electrocardiology: mathematical and numerical modeling (with P. Colli Franzone, L. F. Pavarino; contribution). In Complex systems in biomedicine, pages 187–241. Springer Italia, Milan, 2006.

Invited presentations to conferences (selection)

- mSPACE Kickoff Meeting: *Multiscale Stochastics, Patterns, and Analysis of Combinatorial Environments*, Bocconi University, Milano, 2026
- CIRM Workshop: *Aggregation-Diffusion Equations & Collective Behavior: Analysis, Numerics and Applications*, Marseille, 2024
- MFO Workshop: *Applications of Optimal Transportation*, Oberwolfach, 2024
- ICMS Workshop: Optimal Transport and the Calculus of Variations, Edinburgh, 2023, *Geodesic convexity of entropy functionals in Hellinger-Kantorovich metric*
- Workshop on The Mathematics of Subjective Probability, Milano, 2023, *Sobolev spaces on the Wasserstein space of probability measures*
- Workshop Calculus of Variations & Geometric Measure Theory, Pisa, 2023, *Evolution of probability measures: beyond gradient flows*
- BIRS Workshop: Nonlinear Diffusion and nonlocal Interaction Models - Entropies, Complexity, and Multi-Scale Structures, Granada, 2023, *A Lagrangian approach to dissipative evolutions of probability measures*
- Workshop Frontiers of Numerical PDEs, Maryland, 2023, *Evolution equations in spaces of probability measures*
- Workshop Interpolation of Measures, Paris, 2023, *Fine properties of geodesics and geodesic λ-convexity for the Hellinger-Kantorovich distance*
- MFO workshop: Heat Kernels, Stochastic Processes and Functional Inequalities, Oberwolfach, 2022, *Capacitary modulus and Newtonian-Sobolev capacity in metric measure spaces*
- HCM Conference: From Dirichlet Forms to Wasserstein Geometry, Bonn, 2022, *Density of subalgebras of Lipschitz functions in metric Sobolev spaces and applications to measured Wasserstein spaces*
- Workshop on Frontiers in Nonlocal Nonlinear PDEs, Anacapri, 2022, *Dissipative evolutions of probability measures*
- Workshop 20 years of Summer Schools on CalcVar in Rome, Roma, 2022, *Evolution of probability measures*
- Workshop Geometric Measure Theory and applications, Cortona, 2021, *Lipschitz approximation, Capacity and Capacitary Modulus in metric Newtonian-Sobolev spaces*
- MFO workshop: Applications of Optimal Transportation in the Natural Sciences (online), Oberwolfach, 2021, *Dissipative evolution of measures*
- Workshop: Calculus of Variations and Applications, SISSA, Trieste, 2020, *Singular perturbation of gradient flows and rate-independent evolution*
- XXI Congresso Unione Matematica Italiana, 2019. Plenary Speaker
- Workshop: Optimal transport and Geometric Analysis, Venice, 2019.
- ICMS Workshop: Gradient flows: challenges and new directions, Edinburgh, 2018.
- BIRS workshop: Topics in the Calculus of Variations: Recent Advances and New Trends, Banff, 2018.
- BIRS workshop: Entropies, the Geometry of Nonlinear Flows, and their Applications, Banff, 2018.
- MFO workshop: Variational Methods for Evolution Oberwolfach, 2017
- MFO workshop: Applications of Optimal Transportation in the Natural Sciences Oberwolfach, 2017
- 7^{th} European Congress of Mathematics, Berlin: section "Analysis and PDEs". Invited speaker.
- MFO workshop: Heat Kernels, Stochastic Processes, and Functional Inequalities, Oberwolfach, 2016.
- Conference on New trends in Optimal Transport, HIM, Bonn, 2015.
- BIRS workshop: Entropy Methods, PDEs, Functional Inequalities, and Applications, Banff, 2014.

- International Conference on Fractal Geometry and Stochastics V, Tabarz, 2014. Plenary speaker.
- Workshop on Infinite-Dimensional Geometry, MSRI, Berkeley, 2013.
- EQUADIFF 2013, Prague. Plenary speaker.
- BIRS Workshop: Optimal Transportation and Differential Geometry Banff, 2012.
- MFO workshop: Interplay of Analysis and Probability in Physics, Oberwolfach, 2012.
- MFO mini-workshop: Manifolds with Lower Curvature Bounds, Oberwolfach, 2012.
- RISM meeting: Multiphase and Multiphysics problems, Verbania (IT), 2011.
- BIRS workshop: Nonlinear Diffusions and Entropy Dissipation: From Geometry to Biology, 2010.
- CIRM-HCM Meeting: Stochastic Analysis, SPDEs, Particle Systems, Optimal Transport 2010.
- Workshop on Particle systems, nonlinear diffusions, and equilibration, HCM, Bonn, 2007.
- Workshop on Optimal Transportation, and Applications to Geophysics and Geometry, Edinburgh, 2007.
- Workshop on Optimal transport: theory and application, Centro De Giorgi, Pisa, 2006.
- ICMS Workshop: Optimal Transportation, Transport Equations and Hydrodynamics, Edinburgh, 2005.
- 10th Conference on Free Boundary Problems, Coimbra, June 7-12, 2005. Plenary speaker.

Invited courses to international advanced schools

- Spring School *Horizons in Nonlinear PDEs*, Universität Ulm, Germany, 2026: Variational Principles for Evolution Problems
- CIME course on *New Trends on Analysis and Geometry in Metric Spaces*, Levico Terme, Italy 2017: Sobolev Spaces in Extended Metric-Measure Spaces
- *Gradient flows and entropy methods*, HIM, Bonn, 2015: The Weighted Energy-Dissipation (WED) principle for gradient flows.
- *Analysis and Geometry on Singular Spaces*, Scuola Normale Superiore, Pisa, 2014: Metric measure spaces with Riemannian Ricci curvature bounded from below.
- *Seventh Summer School in Analysis and Applied Mathematics*, Roma, 2013: Gradient flows and rate-independent evolutions: a variational approach.
- CNA Summer School on *"New Vistas in Image Processing and PDEs"* Carnegie Mellon University, Pittsburgh, 2010: Applications of optimal transport to evolutionary PDEs.
- *School on "Optimal transport: Theory and applications"* Institut Fourier, Grenoble, 2009: Gradient flows and optimal transport.
- *EVEQ2008*, Prague, 2008: A variational approach to gradient flows and rate-independent problems.
- *School in Nonlinear Analysis and Calculus of Variations* Scuola Normale Superiore, Pisa, 2006: Gradient flows: a variational approach.
